ATMOS | TREASURY HISTORY

Four documented fee-distribution rounds | March–August 2026

The treasury wallet was created by AtmosController itself: its first transaction was a 1,000 SUPRA test transfer from the multisig. The recurring flow was:

AtmosController → treasury wallet 0xd19bb4… → swaps → final recipient 0x934e39…

Before November 8, the transfers were made individually per token rather than through a sweep contract.

ROUND 1 | 29 MAR 2026

Fees out of AtmosController

1,000 SUPRA test to final recipient

`0x9b2de43a62d307612b38c16d58c047c3cc1bbab3c9cdc7d68f1a3ce460b979e3`

1,000 SUPRA test to treasury wallet (wallet creation)
